

## Experience the magic of ECA at home

Take two small flower pots and plant your favourite plant.

Fill one pot with regular soil and fill the other pot with ECA as instructed in the diagrams.

Observe the difference in the growth pattern and quality of plants.

Also notice the terrific insect-repellent characteristic of ECA plantation.

Caution: Though ECA looks very tempting, but it is yummylicious only for plants, not for humans. So please DO NOT EAT.

8- 15 MM ECA

2-8 mm Crushed ECA + Soil + Compost

Geotextile Layer ( 150 gsm )

8- 15 MM ECA

8 - 15 mm ECA

2-8 mm Crushed ECA +  
Soil + Compost
